How-To Use Your Candle

Get the most from your candle

To ensure complete burning of this candle, please keep the candle lit for at least 2 hours during each use.

We typically recommend burning the candle for 2 hours in a 12' x 12' room (~150 ft2), and moving it from room to room until all areas are treated.

If worried about leaving an open flame, place the candle inside a large pot and move the pot from room to room.

It is safe for you and your pets to remain in the room while it is being treated.
